INDEX—AUTHOR AND SUBJECT

Page

Absorption
Calculation of absorption to any moisture basis. E. Gookins..... 305
Aging
The change in hydrogen-ion concentration of wheat and mill products with age. P. F. Sharp..... 117
Changes in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage. C. H. Bailey and A. H. Johnson..... 133
Effect of storage on baking quality of common and durum wheats. C. E. Mangels..... 168
Aleurone
A study of aleurone cells of cereals. E. B. Bennion..... 138
Effect of germination on the aleurone layer. E. B. Bennion..... 179
Alsberg, C. L. and O. S. Rask. Viscosimetric study of wheat starches 7
and O. S. Rask. Gelatinization by heat of wheat and maize starch 107
and D. B. Dill. Some critical considerations of the gluten washing problem 222
Ash
Glycerol as an aid in ashing flour. R. Hertwig and L. H. Bailey 82
Report of committee on ash determinations..... 189
Bailey, C H. Notes..... 151
Review of "Practical Milling" by B. W. Dedrick..... 275
Review of "The Romance of the Holes in Bread," by I. K. Russell 276
and Amy M. LeVesconte. Physical tests of flour quality with the Chopin Extensimeter 38
and A. H. Johnson. Changes in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage..... 133
and A. H. Johnson. Carbon dioxide diffusion ratio of wheat flour doughs as a measure of fermentation period..... 293
and A. H. Johnson. A physico-chemical study of cracker dough fermentation 327
and J. Hendel. The quality of gluten of flour mill streams as determined by the viscosity of water suspensions..... 320
Bailey, L. H., et al. Report of the committee on methods of analysis 207
and R. Hertwig. Glycerol as an aid in ashing flour..... 82
Baking tests. Formulas and methods of procedure. L. A. Fitz..... 251
Baking quality. Effect of storage of wheat. C. E. Mangels..... 168
Bennion, E. B. A study of the aleurone cells of cereals..... 138
Effect of germination on the aleurone layer..... 179
Blish, M. J. Cereal chemistry of today. 1
and A. J. Pinckney. The identity of gluten proteins from various wheat flours 309
Book reviews, C. H. Bailey..... 275

Bread
The size of the pores in baked bread. K. Mohs 149
Bread troubles in the light of hydrogen-ion concentration. R. J. Clark 161
Cake flour laboratory. P. M. Patterson 159
Carbon dioxide diffusion ratio of wheat flour doughs as a measure of fermentation period. C. H. Bailey and A. H. Johnson 293
Cereal chemistry of today. M. J. Blish 1
Clark, R. J. Bread troubles in the light of hydrogen-ion concentration 161
Chlorine
Effect of water containing free chlorine in bread making. C. B. Morison 267
Changes in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage. C. H. Bailey and A. H. Johnson 133
Chopin Extensimeter. Physical tests of flour quality. C. H. Bailey and Amy M. LeVesconte 38
Constitution of American Association of Cereal Chemists
Revisions to, in 1924 ..... 206, 209
As revised in 1924 272
Counting yeast cells in dough. H. E. Turley 261
Convention, June, 1924
Minutes of convention. R. K. Durham, Secretary 203
Registration 211
Resolutions 210
Cracker dough fermentation—a physico-chemical study. A. H. Johnson and C. H. Bailey 327
Dedrick, B. W. Practical milling. Review of, by C. H. Bailey 275
Diastatic activity of malt—influence of temperature on optimum hydrogen-ion concentration. A. G. Olsen and M. S. Fine 215
Dill, C. B., and C. L. Alsberg. Some critical considerations of the gluten washing problem 222
Dough. Counting yeast cells. H. E. Turley 261
Elmer, Roma, and P. F. Sharp. Proteolytic enzymes of flour I. Autodigestion of flour milled from frozen and non-frozen wheat harvested at various stages of maturity 83
Federal spring wheat grades—a discussion. J. H. MacMillan, Jr. 65
Fermentation of doughs
A physico-chemical study of cracker dough fermentation. A. H. Johnson and C. H. Bailey 327
Carbon dioxide diffusion ratio of wheat flour doughs as a measure of fermentation period. C. H. Bailey and A. H. Johnson 293
Fine, M. S., and A. G. Olsen. Influence of temperature on optimum hydrogen-ion concentration for the diastatic activity of malt .. 215
Fitz, L. A. Formula and method of procedure for experimental baking tests 251
Flour
Cake flour laboratory. P. M. Patterson 159
The quality of gluten of flour mill streams as determined by the viscosity of water suspensions. J. Hendel and C. H. Bailey .. 320

The identity of gluten proteins from various wheat flours. M. J. Blish and A. J. Pinckney 309
Changes in hydrogen-ion concentration with age. P. F. Sharp.... 117
Change in hydrogen-ion concentration and electrolytic resistance of water extracts in storage. C. H. Bailey and A. H. Johnson 133
Viscosity as a measure of gluten quality. R. A. Gortner..... 75
Auto-digestion of flour from frozen and non-frozen wheat. P. F. Sharp and Roma Elmer 83
French School of Milling. M. T. Pecaud..... 317
Frozen and non-frozen wheat—Proteolytic enzymes of flour. P. F. Sharp and Roma Elmer 83
Gelatinization by heat of wheat and maize starch. C. L. Alsberg and O. S. Rask 107
Germination—effect of, on the aleurone layer. E. B. Bennion..... 179
Gluten
Viscosity as a measure of gluten quality. R. A. Gortner..... 75
Effect of yeast fermentation on imbibitional properties of gluten. P. F. Sharp and R. A. Gortner..... 29
Gluten quality. C. B. Kress..... 247
The quality of gluten of flour mill streams as determined by the viscosity of water suspensions. J. Hendel and C. H. Bailey 320
Lipoids, a factor influencing gluten quality. E. B. Working..... 153
Some critical considerations of the gluten washing problem. D. B. Dill and C. L. Alsberg 222
The identity of gluten proteins from various wheat flours. M. J. Blish and A. J. Pinckney..... 309
Glycerol
As an aid in ashing flour. R. Hertwig and L. H. Bailey..... 82
Gortner, R. A.
Viscosity as a measure of gluten quality..... 75
and P. F. Sharp. Effect of yeast fermentation on imbibitional properties of gluten 29
Grades of wheat—a discussion of the Federal spring wheat grades. J. H. MacMillan, Jr..... 65
Hendel, J., and C. H. Bailey. The quality of gluten of flour mill streams as determined by the viscosity of water suspensions..... 320
Herman, R. S., and A. R. Sasse. Characteristics of the 1923 hard winter wheat crop 26
Hertwig, R., and L. H. Bailey. Glycerol as an aid in ashing flour.... 82
Hydrogen-ion concentration
The change in hydrogen-ion concentration of wheat and mill products with age. P. F. Sharp..... 117
Changes in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage. C. H. Bailey and A. H. Johnson..... 133
Bread troubles in the light of hydrogen-ion concentration. R. J. Clark 161
Influence of temperature on optimum hydrogen-ion concentration for diastatic activity of malt. A. G. Olsen and M. S. Fine.... 215
Index for Volume I..... 411
Ismert, Theodore F. Obituary..... 277

Johnson, A. H., and C. H. Bailey. Changes in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage 133
and C. H. Bailey. Carbon dioxide diffusion ratio of wheat flour doughs as a measure of fermentation period..... 293
and C. H. Bailey. A physico-chemical study of cracker dough fermentation 327
Kress, C. B. Gluten quality 247
LeVesconte, Amy M., and C. H. Bailey. Physical tests of flour quality with the Chopin extensimeter 38
Lipoids, a factor influencing gluten quality. E. B. Working..... 153
MacMillan, J. H., Jr., Federal spring wheat grades, a discussion..... 65
Mangels, C. E. Abstract of the report of the referee on cereal foods. Assoc. Official Agr. Chemists, Nov., 1923..... 27
Effect of storage on baking quality of common and durum wheats 168
Minutes of convention, 1924, R. K. Durham, Secretary..... 203
Methods of analysis—report of committee. L. H. Bailey, et al..... 183
Mohs, K. The size of pores in baked bread..... 149
Moisture determinations—report of the committee on methods..... 190
Morgan, R. W. A practical application of the viscosimeter to the mill 288
Morison, C. B. Effect of water containing free chlorine in bread making 267
Report on revision of constitution..... 209
Notes, Bailey, C. H..... 151
Nitrogen determinations—report of committee on methods..... 184
Olsen, A. G., and M. S. Fine. Influence of temperature on optimum hydrogen-ion concentration for the diastatic activity of malt 215
Patterson, P. M. The cake flour laboratory..... 159
Pecaud, M. T. French School of Milling..... 317
Physical tests of flour quality with the Chopin extensimeter. C. H. Bailey and Amy M. LeVesconte..... 38
Pinckney, A. J., and M. J. Blish. The identity of gluten proteins from various wheat flours 309
Pores in bread—the size of. K. Mohs..... 149
Practical milling, by B. W. Dedrick, Review of, C. H. Bailey..... 275
Protein—factors which influence the quantity of protein in wheat. C. O. Swanson 279
Protein determinations—report of the committee on methods. L. H. Bailey, et al..... 186
Proteolytic enzymes of flour from frozen and non-frozen wheat. P. F. Sharp and Roma Elmer 83
Rask, O. S., and C. L. Alsberg. A viscosimetric study of wheat starches 7
and C. L. Alsberg. On the gelatinization by heat of wheat and maize starch 107
Referee on cereal foods; A. O. A. C.—Abstract of report. C. E. Mangels 27
Registration at convention of Amer. Assoc. Cereal Chemists, June, 1924 211
Resolutions, A. A. C. C. Convention, June, 1924..... 210
Russell, I. K. The romance of the holes in bread. Reviewed by C. H. Bailey 276
Sasse, A. R., and R. S. Herman. Characteristics of 1923 hard winter wheat crop 26

Secretary-Treasurer's report, A. A. C. C., June, 1924. R. K. Durham 207
Sharp, P. F. Change in hydrogen-ion concentration of wheat and mill products with age 117
and R. A. Gortner. Effect of yeast fermentation on imbibitional properties of glutenin..... 29
and Roma Elmer. Proteolytic enzymes of flour I. Auto-digestion of flour milled from frozen and non-frozen wheat harvested at various stages of maturity 83
Starch
A viscosimetric study of wheat starches. O. S. Rask and C. L. Alsberg 7
On the gelatinization by heat of wheat and maize starch. C. L. Alsberg and O. S. Rask 107
Storage
Effect of, on baking quality of common and durum wheat. C. E. Mangels 168
Change in hydrogen-ion concentration of wheat and mill products with age. P. F. Sharp..... 117
Change in hydrogen-ion concentration and electrolytic resistance of water extracts of natural and chlorine treated flour in storage. C. H. Bailey and A. H. Johnson..... 133
Sustaining members..... 277
Swanson, C. O. Factors which influence the quantity of protein in wheat 279
Temperature—influence of, on optimum hydrogen-ion concentration for the diastatic activity of malt. A. G. Olsen and M. S. Fine.... 215
Turley, H. E. Counting yeast cells in dough..... 261
Viscosity
Viscosity as a measure of gluten quality. R. A. Gortner..... 75
Effect of yeast fermentation on imbibitional properties of glutenin, P. F. Sharp and R. A. Gortner..... 29
A viscosimetric study of wheat starches. O. S. Rask and C. L. Alsberg 7
On the gelatinization by heat of wheat and maize starch. C. L. Alsberg and O. S. Rask..... 107
A practical application of the viscosimeter to the mill. R. W. Morgan 288
The quality of gluten of flour mill streams as determined by the viscosity of water suspensions. J. Hendel and C. H. Bailey.. 320
Water—effect of free chlorine, in bread making. C. B. Morison..... 267
Wheat
A discussion of Federal spring wheat grades. J. H. MacMillan, Jr. 65
Characteristics of 1923 hard winter wheat crop. R. S. Herman and A. R. Sasse 26
Frozen wheat—proteolytic enzymes of flour. P. F. Sharp and Roma Elmer..... 83
Changes in hydrogen-ion concentration of, with age. P. F. Sharp 117
Effect of storage on baking quality of common and durum wheats. C. E. Mangels 168

Factors which influence the quantity of protein in wheat. C. O. Swanson 279
Working, E. B. Lipoids, a factor influencing gluten quantity..... 153
Yeast and Fermentation
Counting yeast cells in dough. H. E. Turley..... 261
Effect of yeast fermentation on imbibitional properties of gluten. P. F. Sharp and R. A. Gortner..... 29
Effect of water containing free chlorine in bread making. C. B. Morison 267
Carbon dioxide diffusion ratio of wheat flour doughs as a measure of fermentation period. C. H. Bailey and A. H. Johnson.... 293

SUSTAINING MEMBERS OF AMERICAN ASSOCIATION OF CEREAL CHEMISTS

Arkansas City Milling Co., Arkansas City, Kan.
Bakeries Service Corporation, Chicago, Ill.
Banks, A. J., Ogilvie Flour Milling Company, Montreal, Canada.
Dunwoody Industrial Institute, Minneapolis, Minn.
El Reno Mill & Elevator Co., El Reno, Okla.
Gooch Milling & Elevator Co., Lincoln, Neb.
W. W. Hatton, c/o Messrs. Sale and Frazer, Tokio, Japan
Hecker-Jones-Jewell Milling Co., New York City, N. Y.
The Fleischmann Company, New York.
The Hoffman Mills, Enterprise, Kan.
The Ismert-Hincke Milling Company, Kansas City, Mo.
International Milling Co., Minneapolis, Minn.
Kansas Milling Co., Wichita, Kan.
Larabee Flour Mills Corporation, Kansas City, Mo.
John J. Lentes, Williams Bakery, Scranton, Pa.
Liberty Yeast Corporation, New York City.
Milton-Hersey Co., Ltd., Winnipeg, Canada.
Minnesota State Experimental Flour Mill, Minneapolis, Minn.
Montana Experiment Station Grain Laboratory, Bozeman, Mont.
V. H. Noury & Van der Lande (Novadel Processes), Buffalo, N. Y.
Portland Flour Mills Co., Portland, Ore.
Practicum. Ltd., London, England
Purity Baking Co., St. Paul, Minn.
Shellabarger Mill & Elevator Company, Salina, Kan.
Societe Anonyme de Minoteries et D'Elevateurs A Grains, 24 Rue Royale, Bruxelles, Belgium
Southwestern Milling Co., Kansas City, Mo.
Bernard Stern & Sons, Inc., Milwaukee, Wis.
Wallace & Tiernan Co., Newark, N. J.
Washburn-Crosby Company, Minneapolis, Minn.
Western Canada Flour Mills Co., Winnipeg, Canada
Wichita Mill & Elevator Co., Wichita Falls, Tex.
Wichita Flour Mills Co., Wichita, Kan.
